## **Jemez Mountains Electric Cooperative, Inc.'s Rate Change Request Heard at New Mexico PRC Meeting**

### **Next Steps Include Response to Protests by JMEC, PRC Staff Determinations**

**ESPANOLA, N.M., January 27, 2022** – The New Mexico Public Regulation Commission (PRC) issued an order suspending rates proposed by Jemez Mountains Electric Cooperative, Inc. (JMEC), following its Wednesday, January 26, 2022, meeting, directing JMEC to file its objections (response) to protests filed by Thursday, February 3.

Upon receipt of JMEC's response, PRC Staff will have until Thursday, February 10, to file its determination which includes, among other matters, the number of valid, timely protests per rate class; if Staff agrees with JMEC's objections to the protests and why; if JMEC's Advice Notice met regulatory requirements; and whether the PRC should assign this rate change request to a hearing examiner for a public hearing.

JMEC will produce an update and post it to this page when the commission next takes material action.
